CSI Country Wide Case Study Safety Strategy Discussion

Construction Safety Investigator

Instructions

The objective of this tool is to provide field supervisors with information to proactively engage workers and discuss safety related concerns that they may encounter. Safety discussions should not be limited to the subject above and should pertain to the activities that workers will be involved in that may have the potential for safety related exposures.

Case Day:

January 2007

Accident Type:

Ladder Accident - Improper Use

Relevant laws, rules and Manual codes may include:

29 CFR 1926.21(b)(2), 29 CFR 1926.1053(b), MIOSHA PART 11, RULE 1124(2), PART 1, RULE 114(1),

Case:

Carpenter fatally injured when ladder slips out of position

Accident Detail:

A carpenter (victim) jumped/fell from a ladder that slipped away from the drip edge of a house. The decedent positioned the fiberglass extension ladder diagonally across the inside corner of the roof to secure a 2-inch by 4-inch piece of wood to the fascia under the drip edge to protect the drip edge. The ladder's safety feet were in an up position on the frozen soil.

He called to his coworker to hold the ladder while he accessed the roof area. The decedent and the coworker who himself was the owner of a construction company were building a "spec" home. The coworker stood underneath the ladder and held the rungs with his hands. The decedent climbed the ladder holding the wood when the base of the ladder slipped away from the house. The falling ladder struck the coworker on his shoulder and arm and knocked him to the ground. The decedent fell to the coworker's left and landed on his back.

Reconstructive Safety Evaluation:

- · What are some of the possible causes of the accident being discussed?
- What actions could have been taken that might have prevented this accident from occurring?

Accident Scene Conclusion:

- Neither the coworker's company (Residential GC) nor the decedent' corporation (Subcontractor) had a safety and health program.
- The base material was sand, frozen to a depth of approximately four inches, and the portable fiberglass extension ladder was not secured in a manner to prevent it from being displaced.

Preventive Safety Measures Include:

- Complete a Job Safety Task Analysis that includes scope of work, anticipated exposures and safety equipment and/or procedures needed to ensure the task is completed successfully and safely.
- Conduct a pre-work meeting to review the JSTA and ensure workers understand the task to be completed, any safe working procedures and have the necessary safety equipment.
- Employers should ensure that ladders are used in accordance with the requirements of existing safety standards and good standard practice which includes; securing the ladder from accidental displacement, set at proper pitch and safe procedures when working from a ladder.

Chubb. Insured.[™]

Chubb is the marketing name used to refer to subsidiaries of Chubb Limited, providing insurance and related services. For a list of these subsidiaries, please visit our website, www.chubb.com. Insurance is provided by ACE American Insurance Company and its U.S. based Chubb underwriting company affiliates. All products may not be available in all states. This communication contains product summaries only. Coverage is subject to the language of the policies as actually issued. Surplus lines insurance is sold only through licensed surplus lines producers. Loss control evaluations, reports, recommendations and services are made solely to assist the insurer in underwriting and loss control and are not to be construed as an added benefit for the insured, property owner or any other party (this may not apply if loss control services are purchased separately and specifically pursuant to a service agreement). Evaluation for any hazard or condition does not imply that it is covered under any policy. Chubb is the world's largest publicly traded property and casualty insurance group. With operations in 54 countries, Chubb provides commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance and life insurance to a diverse group of clients. Chubb Limited, the parent company of Chubb, is listed on the New York Stock Exchange (NYSE: CB) and is a component of the S&P 500 index.
