

Chubb Construction On-line Training Programs

CHUBB®

The Chubb Difference

As a leader in insuring those in the construction industry, the Chubb Construction Practice Group also brings its innovation and critical thinking to safety efforts in the construction industry.

To help in your efforts of creating and maintaining an effective safety culture - and to help with reduction of accidents and injuries on the job, Chubb has developed an array of tools and resources.

About the Training Programs

Chubb Construction Risk Engineering is developing a series of On-line Training Programs that can be utilized by all levels of your company's staff including office and management staff, project engineers, project field supervision and craft labor in effort to educate and inform your construction team members of the potential hazards that can affect daily projects.

Our training programs are interactive and provide a mix of media learning styles such as narrative, photographs and video, to deliver the information as well as course check-points that test the student's knowledge along the way.

Fall Protection

The first program in the training series is Fall Protection. Topics covered within this course program include, but are not limited to:

- Perimeter protection
- Holes and openings
- Ladders
- Personal Fall Arrest Systems
- Scaffolds

This program discusses OSHA requirements as well as industry best practices. The on-line training tool can be utilized in conjunction with your new employee orientation and on-boarding, project management safety training, craft labor safety training as well as part of disciplinary/accountability procedures for workers observed violating fall related safety practice and procedures.

Falls continue to be the most frequent cause of death on construction sites. The statistics are alarming and unacceptable in this day and age. Improving on the overall safety performance in the Construction Industry requires continued commitment, implementation and execution by management and workers.

We hope you find the Chubb Construction On-line Training Programs a valuable addition to your safety and risk management library. It is another demonstration of the Chubb commitment to assist our construction clients in their risk management efforts.
